

**Adapt A Vet delivers a barrier free living environment for disabled U.S. Veterans through adaptation and modifications.**

*“What Freedom Feels Like in their Own Home”©*

There are unmet needs of home adaptations for Texas disabled veterans. Many live in homes that are not adapted for everyday activities such as getting in the shower, preparing meals and gaining home access, adversely impacting the Veteran and their family’s quality of life. Through our compassionate and respectful adaptation process, these Veterans can live more fruitful lives and focus on their future. In addition, changes to the home can also be made to assist the veteran if a service animal is required.
